

Did you know that...

... Choosing a floor stripper is difficult for most users ?

Why stripping ?

Stripping is the key preparation step, which guarantees the longevity and resistance of your floor. This involves removing existing paint layers, wear and tear, varnishes, finishes and oils to restore your surface to its "bare" state. This step also provides you with a better guarantee of the effect and quality of the finish you want.

What are the criteria to maximize the efficiency of a stripper's work?

- 1 Time : the chosen stripper must be liquid so that it can be applied more quickly.
- The mechanical effect of the product : mechanical or manual, stripping is a working method that allows some control, but can be long and difficult. Therefore, it is necessary to use a stripper which, thanks to its solvents and active ingredients, allows the layers to be easily softened.

**Best floor stripper
on the market!**

INO gloss 9 **Prestige floor stripper**

Old
label

New
label

INO gloss 9 is a powerful product designed specially for floor finish removal on resilient flooring (**vinyl, vinyl composition, vinyl asbestos**).

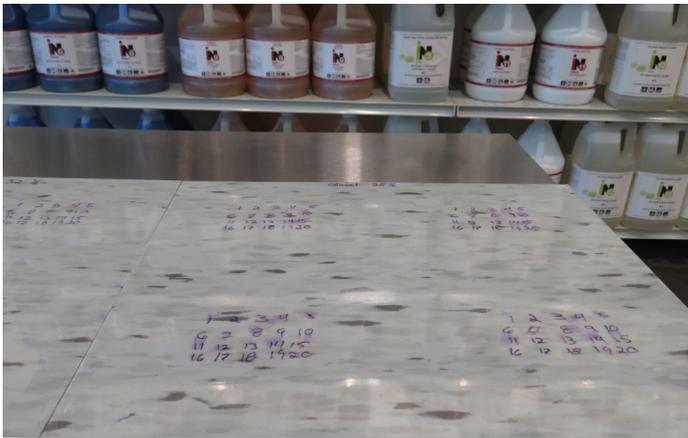

INO-GL9-378 (3.78L)
INO-GL1-189 (18.9L)

- 1** **IMPORTANT:** Do not use on wood, linoleum, rubber, marble, painted surfaces, on surface colored and acid dyed concrete floors as this product may harm these surfaces
- 2** Test for softening or color bleeding on asphalt floors before using.
- 3** Active Ingredients: Monoéthanolamine, alcool benzylique, éthoxylates d'alcool
- 4** Dilution rate:
 - Light build-up of floor finish: 1:8
 - Heavy build-up of floor finish: 1:6
 - Heavy build-up of concrete sealer: 1:4

Fast, efficient and low odour formula!

CHARACTERISTICS

Active Ingredients	Monoéthanolamine, Alcool Benzylrique, Alcool ethoxylates
Appearance	Translucent liquid
Clarity	Clear
Color	Colorless
Dilution	1:4, 1:6, 1:8, 1:10
Foam	Low
Format(s)	3.78 L 18.9 L
Odour/perfume/fragrance	Low Odour
PH	13
VOC	20%
Viscosity	Non-Viscous

FEATURES

Formulated for effective stripping the first time, reducing the need for additional reclosing.

Fast penetration of built up finishes and sealer layers, and specially formulated to penetrate and emulsify the toughest UHS burnished finishes.

Cost effective solution with variable dilution rates utilizing cool water.
