To soften and remove food soils from dishware, stainless steel and silverware.

INO chef 40

A heavy duty alkali cleaner used in soak tank to soften and remove food soils from ceramic, melamine, stainless steel and silver flatware.

Instructions

- Dilute 7gr to 1 litre of water at around 55°C.
- Completely immerse utensils and soak 10 minutes minimum.
- After soaking proceed to automatic wash.

CAUTION:

Do not use presoak to clean aluminum utensils.
